As per the data, Kolkata recorded the highest appreciation in average residential prices at 15 YoY, followed by Delhi NCR and Hyderabad.

As per the data, Kolkata recorded the highest appreciation in average residential prices at 15 YoY, followed by Delhi NCR and Hyderabad with 14 per cent and 13 per cent increase, respectively.

Among eight cities, MMR was the only cities that saw fall in average prices during the April-June quarter by 3 per cent to ₹19,111 per square feet due to significant new supply and rising unsold inventory.

Housing prices in Delhi-NCR rose by an average 14 per cent year-on-year during April-June period, but fell 3 per cent in Mumbai Metropolitan Region (MMR), according to a joint report by CREDAI, Colliers India and Liases Foras.

analysing housing prizes in metropolitan areas of india

aims to examine the dynamics of house prices in metropolitan cities in an emerging economy. The purpose of this study is to characterise the house price dynamics and the spatial heterogeneity in the dynamics.

The author explores spatial heterogeneity in house price dynamics, using data for 35 Indian cities with a million-plus population.

The research methodology uses panel econometrics allowing for spatial heterogeneity, cross-sectional dependence and non-stationary data

The author tests for spatial differences and analyses the income elasticity of prices, the role of construction costs and lending to the real estate industry by commercial banks.

The role of urban planners, and local and regional governance, is essential to remove the bottlenecks from the demand side or supply side factors that can lead to runaway prices.

The second driver, the reversion rate to long-term equilibrium (estimated at -0.18), is higher than rates reported from developed markets.
